

Coronavirus (COVID-19) Information

Update 39: June 25, 2020

The Road Back: Data Determines Dates NJ is in Stage 2 “Middle Stage” of Reopening

[Governor Murphy, Governor Cuomo and Governor Lamont Announce Joint Incoming Travel Advisory That All Individuals Traveling From States With Significant Community Spread of COVID-19 Quarantine For 14 Days](#)

*While this advisory was issued as a joint statement by NY, NJ and CT, the implementation in each state is not the same. **New Jersey has issued a travel advisory only, and there is no mandate or executive order enforcing the 14-Day quarantine advisory.***

New Jersey Governor Phil Murphy, New York Governor Andrew M. Cuomo, and Connecticut Governor Ned Lamont announced a joint incoming travel advisory that all individuals traveling from states with significant community spread of COVID-19 quarantine for a 14-day period from the time of last contact within the identified state.

This quarantine – effective June 25, 2020 – applies to any person arriving from a state with a positive test rate higher than 10 per 100,000 residents or a state with a 10% or higher positivity rate over a 7-day rolling average.

In NJ, there is no executive order enforcing or mandating this advisory, should that change, we will inform you immediately.

We understand NY/CT may be implementing this advisory differently, but in New Jersey this is an advisory / recommendation by the government for travelers coming from these “high impact areas” to take personal responsibility and follow the quarantine suggestion.

In addition, at yesterday’s conference, **the governor used “should” and not “must”** in his verbal announcement regarding the advisory:

“Visitors from highly impacted states should self-quarantine upon arrival in New Jersey, New York, or Connecticut.”

It is our understanding that many member companies, including CCNJ, have pandemic travel policies in place – including for personal vacations, and we recommend that you continue to follow the protocols you already have in place.

Best practice has been to quarantine after traveling internationally and visiting high impacted areas. If you recall, both Texas and Florida placed a 14-day quarantine on travelers from New York and New Jersey who visited their state prior to this announcement.

With many CCNJ companies already canceling all business travel until 2021, and in some cases requiring employee travel plans, including vacations, be approved and discussed with their supervisor and adhere to appropriate guidance for quarantining and testing upon returning, **it is likely that this new advisory may already be well addressed within your policies.**

CCNJ member companies have employees engaging in essential business travel between NJ and these “high impact areas.” Your company should take this advisory into consideration and implement or update your travel policies if warranted.

For now, CCNJ’s suggestion is to continue to practice personal responsibility and follow the protocols and policies your company already has in place and following before this advisory. Even though the state is in the middle of Stage 2, companies should continue to evaluate their travel policies to take into consideration the current situation, and if necessary, limit employees from returning to the workplace if they have traveled to the states listed in the advisory. As well, we suggest that precautions be taken and that you consider the “[CDC Guidance: Safety Practices for Critical Infrastructure Workers Who May Have Had Exposure to a Person with Suspected or Confirmed COVID-19](#)” for returning travelers from the “hot spots,” if warranted.

In many cases, employees continue to work from home, and not at the workplace, so this advisory may have limited impact for your workplace. The state has continued to advise that anyone who can work from home, should be allowed to do so for the foreseeable future. Some companies are not considering a return to the workplace for most employees until New Jersey enters Stage 3. Even then, the return will be limited.

Again, this is for New Jersey only. There are reports that New York is issuing an executive order with enforcement powers, but in New Jersey that is not the case. **The advisory for New Jersey is more an appeal to personal responsibility than a mandate, and we do not anticipate that it will change.**

NJDEP COVID-19 REGULATORY COMPLIANCE

Please note that the following items have recently been posted on [DEP's COVID-19 Regulatory Compliance website](#):

- Second Extension of Municipal Tonnage Grant Application Deadline to September 1, 2020
 - <https://www.nj.gov/dep/covid19regulatorycompliance/docs/second-extension-of-mtg-2020-application-to-september-1.pdf>
- Extension of Regulated Medical Waste Submission of Generator Annual Report Deadline to September 19, 2020
 - <https://www.nj.gov/dep/covid19regulatorycompliance/docs/extension-of-rmw-generator-annual-report-deadline-to-sept-19.pdf>

- Extension of Electronic Waste (E-Waste) Semiannual Report Submission Deadline to September 30, 2020
 - <https://www.nj.gov/dep/covid19regulatorycompliance/docs/extension-of-e-waste-semiannual-report-submission-deadline-to-september-30-2020.pdf>

EXECUTIVE ORDER 122 (REQUIRING FACE COVERINGS, GLOVES, AND SOCIAL DISTANCING & DISINFECTING PROTOCOLS) IS STILL PLACE.

Regarding [Executive Order 122](#), which requires employers to provide face coverings and gloves to employees who are still reporting to the workplace, and not working from home, members are expected to comply with the spirit of this EO.

Some manufacturing processes and other issues may prevent masks and/or gloves to be used. CCNJ recommends member companies to document the reason as to why face coverings cannot be used in certain processes, and to implement a protocol to wipe down or disinfect areas and maintain all other proper social distancing protocols. You may even consider installing separation panels.

The state strongly encourages employees who can perform their jobs while working from home, should be allowed to do so for the foreseeable future.

While there is no proactive enforcement of the EO, employees can [report any violations](#) in regard to the EO's by an employer via [NJ's COVID-19 portal](#). That is why we stress that member companies communicate directly to employees on how they are complying with the EO and providing a safe work environment, and in cases where a mask or glove is not provided make sure employees are aware of the reason, and given proper guidance on hygiene protocols.

Companies must continue to make sure they are providing the face coverings (and gloves), and that the employees entering the workplace have them. But when they are alone in an office with no one else, there is no requirement to wear the mask. However, some companies have instituted policies requiring employees to wear face coverings 100% of the time while on site. As anticipated by CCNJ, these requirements continue even during the process of reopening.

Below you will find new information **highlighted in blue** added since the last update. As well, take some time and explore the many links and information provided below and in previous updates. The state's main COVID-19 information portal is located at <https://covid19.nj.gov/>.

New Jersey Governor Updates

[Governor Murphy, Governor Cuomo and Governor Lamont Announce Joint Incoming Travel Advisory That All Individuals Traveling From States With Significant Community Spread of COVID-19 Quarantine For 14 Days](#)

New Jersey Governor Phil Murphy, New York Governor Andrew M. Cuomo, and Connecticut Governor Ned Lamont today announced a joint incoming travel advisory that all individuals

traveling from states with significant community spread of COVID-19 quarantine for a 14-day period from the time of last contact within the identified state.

<https://nj.gov/governor/news/news/562020/approved/20200624a.shtml>

[TRANSCRIPT: June 24th, 2020 Coronavirus Briefing Media](#)

Before we hear from them, we do have a couple of announcements to make. Earlier today, I held a press call with Governor Andrew Cuomo of New York and Governor Ned Lamont of Connecticut. Working together in so many areas, we have crushed the curves of new cases and of the numbers of our residents in hospitals and connected to ventilators across the tri-state region. We've significantly lowered rates of transmission, put in some of the nation's strongest and best testing protocols, and we are emerging from this stronger. In fact, our three states are among only four listed by researchers and experts at COVID Act Now as being close to containing this virus. We've gotten to where we are today through shared sacrifice. And by the way, you all out there are a huge reason why we have. Together, we are advising visitors to our region from highly impacted states, and those are states with current daily positivity percentages that top more than 10% on a rolling seven-day average; or similarly, Judy, more than 10 cases per 100,000 residents, also on a rolling seven-day average, to join us in this mission by taking proper measures when coming to New Jersey, including a period of self-quarantine upon arrival.

OSHA & Labor

[Discretion in Enforcement when Considering an Employer's Good Faith Efforts During the Coronavirus Disease 2019 \(COVID-19\) Pandemic](#)

In light of the coronavirus disease 2019 (COVID-19) pandemic, OSHA understands that some employers may face difficulties complying with OSHA standards due to the ongoing health emergency. Widespread business closures, restrictions on travel, limitations on group sizes, facility visitor prohibitions, and stay-at-home or shelter-in-place requirements may limit the availability of employees, consultants, or contractors who normally provide training, auditing, equipment inspections, testing, and other essential safety and industrial hygiene services. Business closures and other restrictions and limitations may also preclude employee participation in training even when trainers are available. In other situations, access to medical testing facilities may be limited or suspended.
